

Technical Workshop on Atmospheric Dispersion and ADMS 4

Audience

The Workshop is aimed at those who use ADMS or other dispersion models, those who commission or manage air quality studies and those with a general interest in air quality and dispersion modelling. The day will combine technical talks with hands-on exercises and will include advice for the practical application of models and interpreting results. The Workshop follows the ADMS 4 User Group Meeting to be held at the same venue on Tuesday 27 November.

Contents of the day

Technical presentations will cover:

- Approaches to dispersion modelling
- Boundary layer structure and meteorology
- Modelling the effects of buildings on dispersion

Exercises will cover:

- Modelling buildings
- Using advanced meteorological data
- Modelling deposition

Date	Wednesday 28 November
Venue	The Studio, Cannon Street, Birmingham, B2 5EP
Cost	£165 per delegate, includes tea, coffee & lunch

For the hands-on exercises bring along your laptop. If ADMS 4 is not already installed please ensure that you have Administrator rights and will be able to install the software on the day.

CERC are the developers of ADMS 4 and are also experienced in delivering training to a variety of audiences and using the model in studies for clients. This Workshop draws on that experience to deliver a Workshop from which those from a variety of modelling backgrounds will take away new and useful knowledge.
